Student Motivation

Extrinsic Motivation
- Grades
- Parental approval
- Earning potential of a career
- Rewards

Intrinsic Motivation
- fascination with the subject
- a sense of calling to it
- a sense of its relevance to life and the world
- a sense of accomplishment in mastering it

Intrinsic Motivation can result from these student desires:

<table>
<thead>
<tr>
<th>Student Desires</th>
<th>Category</th>
<th>What to do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Control</td>
<td>Personal</td>
<td>create assignments with self-determined components (choose your own paper topics, answer two out of three questions, etc.)</td>
</tr>
<tr>
<td>Competence</td>
<td></td>
<td>create assignments that are challenging, but not too difficult</td>
</tr>
<tr>
<td>Connectedness</td>
<td>Social</td>
<td>connect with your students and encourage them to connect with one another</td>
</tr>
<tr>
<td>Sharing</td>
<td></td>
<td>have students contribute to a shared learning experience and recognize them when they do</td>
</tr>
</tbody>
</table>

Create a STUDENT-CENTERED classroom!

Student-centered environments pay careful attention to the knowledge, skills, attitudes, and beliefs that learners bring to the educational setting. Teachers must realize that new knowledge is built on existing knowledge—students are not blank slates. Therefore, teachers need to uncover the incomplete understandings, false beliefs and naïve renditions of concepts that students have when they begin a course. If these are ignored, students may develop understandings very different from what the teacher intends them to gain.
This allows you to connect with students, relate the material to them and their lives, create coursework with which they can succeed... all essential components of motivation!!

**Strategies for Motivating Students:**
- Become a role model for student interest
- Get to know your students (be learner-centered)
- Use real-world examples & applications freely
- Use a variety of active-learning activities
- Set realistic performance goals
- Place appropriate emphases on testing & grading
- Be free with praise and constructive with criticism
- Give students as much control over their own education as possible
- Allow them to build on their accomplishments (start easy, build to more difficult)
